

Simplifying IP Installations with Power over Ethernet

Power over LAN for Alcatel Installations

IP Telephony End User Benefits

- IEEE 802.3af standard compliant
- Increases availability - using central UPS, IP phones are always live, even during power outage
- Single cable connection per IP phone
- Works with existing Ethernet infrastructure and structured cabling
- Creates centralized network power management of IP phones
- PowerDsine's Web-based SNMP management enables remote monitoring and control of IP phones

Ordering Information

	Alcatel Product Name	Alcatel P/N	Description	PowerDsine Part Number
	Power Patch Panel 24 ports	3BD53000AA	24 port Power over LAN Unit	PD-6024/AC
			24 port Power over LAN unit with SNMP remote management	PD-6024/AC/M
	Power Patch Panel 12 ports	3BD53001AA	12 port Power over LAN Unit	PD-6012/AC
			12 port Power over LAN unit with SNMP remote management	PD-6012/AC/M
	Power Patch Panel 6 ports	3BD53002AA	6 port Power over LAN Unit	PD-6006/AC
			6 port Power over LAN unit with SNMP remote management	PD-6006/AC/M
